DIY Accounting Company Accounts User Guide

Thank you for using DIY Accounting as your limited company accounting system.

Note: This package supports the **small profits Corporation Tax rate** (19%) for companies with taxable profits up to £50,000. Companies with profits above £50,000 should seek professional advice regarding marginal relief and the main CT rate (25%).

Written upon Excel spreadsheets, the Company Accounts system automates bookkeeping through Excel formulae, producing monthly management accounts, published accounts, corporation tax calculations, and a CT600 company tax return.
